SUMMARY

Fast learner. Self-motivated and energetic software engineer with experience in back-end development and a strong foundation in full-stack technologies. Proven ability to contribute to project success through efficient coding, debugging, and a commitment to continuous learning.

SKILLS

HTML, CSS, JavaScript, TypeScript, Java, Python, Groovy, MySQL, Tailwind, Bootstrap, React JS, Node JS, GIT, AWS(S3 bucket, lambda, Queues), Grails, Spring Boot, PHP

EXPERIENCE

Fanz Unlimited LLC - Software Engineer

April 2025 – Present

- Implemented Live Streaming functionality integrating a vendor, also handling all the associated business logic to align with requirements.
- Developed a CRUD in the admin panel that allows administrators to publish articles for platform updates and onboarding, while end users can view, read and like the article considering UI/UX.

Cedargate Technologies - Software Engineer

July 2022 – April 2025

- Implemented functionality to resume file generation from previous stages using S3 bucket, enhancing project resilience
- Researched on new features and feasibility by creating TDD(Test Driven Document)
- Developed features to meet project requirements, demonstrating strong software engineering pricinples
- Created various automated scripts(python, SQL procedures) to trigger schedules, fetch user-created artifiact information, and build tools to increase prodctivity.

Fanz Unlimited LLC - Software Engineer(Part Time)

December 2024 – April 2025

- Implemented various functionalities connecting to vendors and their APIs into our platform for verifying user age and moderating(poizoning) shared content.
- Created a simple and robust User Interface for users on the platforms

US Legal Pro - Software Engineer(Part Time)

July 2024 – October 2024

- Developed a feature that allows legal personnel to send customized emails to users, incorporating specific information such as court numbers and case details.
- Designed and implemented functionality to sort raw data displayed in tables, streamlining the presentation and enabling more efficient data analysis.
- Contributed to enhancing the user interface and overall usability of internal tools, improving operational efficiency.

Cedargate Technoloies - Trainee
March 2022 – July 2022
- Improved debugging skills by resolving complex issues efficiently
- Worked with AWS services, including CloudWatch, CodeCommit, SQS and S3 bucket
- Explored various aspects of software development, acquiring a comprehensive grasp of the entire development lifecycle

Ekbana Solutions - Front End Intern
Jan 2022 – March 2022
- Explored the variations of software development, gaining a comprehensive grasp of the entire development life cycle
- Developed front-end components for an e-commerce website

PROJECTS

PortFolio Management Systerm - Client Side Code | Server Side Code
- Implemented a CRUD application with authentication/authorization
- Used React JS for the front end and Node JS for the backend

A modern Restaurant Landing Page - View Site
- A static website for restaurants developed using react and tailwind.
- A fully responseive design with routing

Education

Bachelor of Science in Computer Science and Information Technology (BSC SCIT) - 2016-2021
Butwal Multiple Campus

11th-12th Science - 2014-2016
Tilottama College

SLC - 2014
Shaheed Smarak English Boarding School
